“

I now have the confidence to make a cohesive plan with farmers, so they can take care of their land and be profitable.

”

Sydney Taylor
BAS in Agricultural Systems

“

My goal is to open my own shop and offer employment to formerly incarcerated individuals like myself.

”

Rick Aguilar
BAS in Business Management

Pay Less & Earn More

Did you know?

BAS degrees are an economical option to achieve a baccalaureate-level degree. In-state students can complete all 4 years for less than \$25,000.

Over 75% of BAS graduates in Washington State have already enrolled in or are planning to continue into a master's or doctoral program.

Attend part-time or full-time at the Walla Walla or Clarkston campus or online.

Graduates of baccalaureate programs at community colleges in Washington State had higher earnings than graduates of regional public four-year universities who earned degrees in the same fields.¹

“

I felt like I could grow further in my education and I have learned so much more than I ever anticipated.

”

Tate Gabriel
BAS in Agricultural Systems
