The Industry

The Institute for Enology and Viticulture provides students with hands-on experience in wine-making, viticulture practices, and wine marketing and sales. To this end, the Institute has developed several acres of teaching vineyards where students actively participate in vineyard management and the growing of quality wine grapes used to support the teaching winery. In addition to the teaching vineyard, the Institute has created a state-of-the-art teaching winery at College Cellars where students are responsible for winemaking and wine chemistry.
